

Chapter 1

Lebesgue Measure and Integration

Lectured by Someone
Typed by Yu Coughlin
Season Year

Introduction

The following are complementary reading for the course.

- G. Grimmett and D. J. A. Welsh, Probability: An Introduction, 1986
- J. K. Blitzstein and J. Hwang, Introduction to Probability, 2019
- D. F. Anderson et al, Introduction to Probability, 2018
- S. M. Ross, Introduction to Probability Models, 2014
- G. Grimmett and D. Stirzaker, Probability and Random Processes, 2001
- G. Grimmett and D. Stirzaker, One Thousand Exercises in Probability, 2009

Contents

| | | | |
|----|----------|--|----------|
| | 1 | Lebesgue Measure and Integration | 1 |
| L1 | 1 | Motivation | 5 |
| | 2 | Measures | 5 |
| | 2.1 | Algebras and σ -algebras | 5 |
| | 2.2 | Measures | 5 |
| | 2.3 | Complete measure spaces | 5 |
| | 3 | Constructing measures | 5 |
| | 3.1 | Pre-measure | 5 |
| | 3.2 | Outer measure | 5 |
| | 3.3 | Restriction | 5 |
| | 3.4 | Lebesgue measure | 5 |
| | 4 | Measurable functions | 5 |
| | 4.1 | Defintion | 5 |
| | 4.2 | Properties | 5 |
| | 4.3 | Continuity | 5 |
| | 5 | Lebesgue integral | 5 |
| | 5.1 | Construction | 5 |
| | 5.2 | Properties | 5 |
| | 6 | Convergence | 5 |
| | 6.1 | Monotone convergence | 5 |
| | 6.2 | Fatou's lemma | 5 |
| | 6.3 | Lebesgue dominated convergence | 5 |
| | 6.4 | Vitali's theorem | 5 |
| | 7 | L^p spaces | 5 |
| | 7.1 | Norms | 5 |
| | 7.2 | L^p spaces | 5 |
| | 7.3 | Normed vector spaces | 5 |
| | 7.4 | Completeness | 5 |
| | 8 | Product measures | 5 |
| | 8.1 | Products of sets | 5 |
| | 8.2 | σ -algebras on product sets | 5 |
| | 8.3 | Product measures | 5 |
| | 9 | Fubini's theorem | 5 |
| | 9.1 | Motivations | 5 |
| | 9.2 | Setup | 5 |
| | 9.3 | Fubini's theorem | 5 |
| | 10 | Differentiation | 5 |
| | 10.1 | Hardy-Littlewood maximal function | 5 |
| | 10.2 | Compact support spaces | 5 |
| | 10.3 | Lebesgue's differentiation theorem | 5 |
| | 11 | Decomposition | 5 |
| | 11.1 | Signed measures | 5 |
| | 11.2 | Hahn decomposition theorem | 5 |
| | 11.3 | Mutually singular measures | 5 |
| | 11.4 | Jordan decomposition theorem | 5 |
| | 11.5 | Lebesgue decomposition theorem | 5 |
| | 11.6 | Radon-Nikodym theorem | 5 |

Lecture 1
Monday
30/10/2023

1 Motivation

2 Measures

2.1 Algebras and σ -algebras

2.2 Measures

2.3 Complete measure spaces

3 Constructing measures

3.1 Pre-measure

3.2 Outer measure

3.3 Restriction

3.4 Lebesgue measure

4 Measurable functions

4.1 Definition

4.2 Properties

4.3 Continuity

5 Lebesgue integral

5.1 Construction

5.2 Properties

6 Convergence

6.1 Monotone convergence

6.2 Fatou's lemma

6.3 Lebesgue dominated convergence

6.4 Vitali's theorem

7 L^p spaces

7.1 Norms

7.2 L^p spaces

7.3 Normed vector spaces

7.4 Completeness

8 Product measures

8.1 Products of sets

8.2 σ -algebras on product sets

8.3 Product measures

9 Fubini's theorem

9.1 Motivations

9.2 Setup

9.3 Fubini's theorem

10 Differentiation
